DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23-28 and 37-39 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Gammon (US Patent #5,682,701).

Gammon teaches in the figures most of the elements of the claimed invention, including a left arm member contiguously connected to a portion of said left side having a generally planar distal end disposed at a first angle to the left side of the torso member and the right arm member contiguously connected to a portion of the right side having another generally planar distal end disposed at a second angle to the right side of the torso member, the first angle of the arm is approximately a right angle and a substantially flat portion forming a bottom of the humanoid figure, each feature shown in figures 1 and 2. However, Gammon fails to teach a plurality of inflatable life-sized humanoid figures. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a plurality of inflatable life-sized humanoid figures, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8. It should be noted that the Examiner takes the position that the device of Gammon is capable of performing the required functional recitations of the claims.

Allowable Subject Matter

Claims 29-36 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

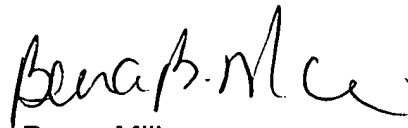

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
